Skills

• C# | MS Office Programs | MySQL | PowerBI | SPSS | Quick Adaptation

Experience

Game Developer	<u>HyperUpLab</u>	07/2023 – 10/2024
<ul style="list-style-type: none">Started as a summer intern and completed a three-month internship.Developed three mobile games using Unity during the internship.Gained valuable experience in a professional workspace, enhancing both technical skills and teamwork abilities.Expanded knowledge and proficiency in C# through practical application and development projects.Internship concluded due to the demands of the senior year of university studies.		

Projects

Data Analysis and Visualization Projects

- Regularly perform data analysis and visualization on various datasets to improve my skills.
- Utilize tools such as PowerBI and MySQL to generate insightful reports and dashboards.
- Explore and analyze daily data trends, presenting findings in visually appealing formats.
- https://github.com/KubilayC/SQL_Projects**

Google Maps Mobile App Development

- Developed a mobile application utilizing the Google Maps API.
- Integrated all standard features of Google Maps, with enhanced performance for faster operation.
- Implemented real-time traffic updates, providing more immediate and accurate traffic information compared to the standard Google Maps application.
- Focused on optimizing user experience through improved loading times and responsiveness.

ERP Reporting System

In a group of 30 people, we created an ERP Report System where I was the leader of the Manufacturing Module. Besides leading a team of five, I focused on creating business and data diagrams, which received feedback notes from the company that we then incorporated into our reports.

Responsibilities:

- Led a team of five members within the manufacturing module.
- Created detailed business and data diagrams.
- Incorporated feedback from the company to enhance the quality of our reports.
